

April 25 – 27, 2022 Westfields Marriott • Chantilly, VA

Protecting Classified Information in the Cyber Age

New for 2022. . .

- Threat Forecast and Top Security Challenges
- New NISP Rule Mandate
- Path Forward for Trusted Workforce 2.0
- Strategies for Cyber Risk Mitigation

GAIN KNOWLEDGE, INSIGHTS AND EXPEDICE

Protecting Classified Information In the Cyber Age

There are big changes taking place in the National Industrial Security Program and NOW is the time to prepare for what lies ahead.

From the transition to Trusted Workforce 2.0 to the transformation of the security clearance process, there are a host of new challenges and compliance issues you'll have to contend with.

To keep pace, your security program must evolve while at the same time counter a growing array of threats — both inside and outside — as corporate and government secrets become more vulnerable than ever.

Get the training you need to prepare yourself and your security team for the challenges you'll face in 2022.

Join the best minds in government and industry security for three innovative days at NSI's 35th Annual IMPACT '22 Conference and Expo on April 25-27 at the Westfields Marriott in Chantilly, VA.

Learn the "How-to" at IMPACT 2022

Learn everything you need-to-know from over 20 leading government and industry security experts at IMPACT '22 — the one conference you and your security team can't afford to miss this year.

Led by a top-flight faculty of speakers and trainers, IMPACT '22 features an impressive line-up of security threat briefings, training workshops, case studies and practical take-home tools to improve your program and prepare you for the security road ahead.

Whether you're new to the profession or an industry veteran, there's no better training opportunity than IMPACT to equip you with the skills and resources needed to make you indispensable at your job.

Connect at IMPACT '22

Join us in-person to reconnect with friends and connect with new colleagues for three days of mission-critical sessions and workshops designed to enhance your knowledge and take your security skills to the next level.

"I enjoy attending the Impact seminar each year. Presenters, material and venue is excellent! I always take back good information to my organization each year."

Pam Spilman SAIC

Recharge, Refocus and Re-Energize

Why does the security community look forward to NSI IMPACT so eagerly every year?

Agenda. The agenda is targeted to your needs. IMPACT is programmed by security professionals who know the responsibilities of your job and the kind of pressures you face. They organize the schedule to make effective use of your valuable — and limited — time by focusing on the issues you face both day-to-day and long-term.

Focus. The participants are your peers. IMPACT draws its audience exclusively from government and industry security managers and professionals — the people who are doing the same job you're doing... the people you want to meet and share with.

Environment. Why get lost in a giant convention center or wait in long lines after a session to meet the speaker? IM-PACT offers small, more intimate sessions that bring you closer to the action and the speakers as well as your peers.

IMPACT 2022 EXTRAS!

1. Top Speakers, Targeted Topics

All speakers are renowned for the topic they will address. Expert instructors from government and industry will arm you with the skills and solutions necessary to successfully implement changing security requirements.

2. It's What You Asked for

We extensively surveyed hundreds of top security professionals to deliver the tailored solutions to the most important challenges you face now... and throughout 2022.

3. Come Away with Solutions

No other conference reveals proven tactics to guarantee enhanced security solutions you can take back with you and implement. You'll get the right balance between government and industry security issues, and sessions for beginners through veteran security practitioners.

4. Practical, In-Depth Workshops

Interactive workshops provide extended training in critical security areas like NISP compliance; clearance processing; counterintelligence; cyber security; insider threat programs; security awareness; case studies, and real-world lessons learned.

5. Professional Development

You'll get career-building strategies and a personalized road map for your professional growth while participating in sessions that you need to advance to the next level.

Security Awareness Fair and Expo

Your registration includes admission to NSI's 2022 Security Awareness Fair and Expo. The major government security agencies will be there offering a broad array of complimentary materials and media through their security outreach programs. These complimentary resources are ready to take home to implement in your organization.

A Sampling of the 2022 Exhibitors

SECURESTRUX

ALPHASAFE

Valuable Take-Home Resources

Every IMPACT '22 registrant goes home with a comprehensive binder

of seminar materials and handouts and a DVD containing the 2022 Edition of NSI's Reference Library.

This remarkable DVD is packed with articles, white papers, checklists, glossaries, reports, surveys, and primary sources.

If you ever need to write policies, prepare reports, plan strategy, forecast trends, or justify procedures... you'll appreciate having all this information at your fingertips.

Champagne Reception

MONDAY, APRIL 25, 5:00 - 6:30PM Please join us for complimentary hors d'oeuvres and champagne. On Monday come meet your colleagues in a fun and relaxed setting, making contacts that will enhance your conference experience — and extend beyond.

Monday April 25

EDUCATIONAL SESSIONS

Keynote Address:

Monday, April 25 8:00am-8:45am

The Rise of Insider Threats: Key Trends to Watch in 2022

Michael J. Orlando, Acting Dir., National Counterintelligence & Security Center

"The risks to government and industry from insider threats are severe. These threats can take many forms, whether it's a federal employee coopted by a foreign adversary to steal sensitive information or a corporate employee clicking on a spear-phishing link that infects their company's networks," according to NCSC Acting Director Michael Orlando, the nation's senior counterintelligence official. The insider threat is evolving and organizations need to evolve with it. In this scenesetting keynote address, Mr. Orlando will discuss the current state of the insider threat and key strategies to defend against threats to classified and sensitive information.

You Will Learn:

- Conditions that contribute to insider threats
- Strategies for spotting insider threats

Monday, April 25 8:45am-9:30am

The Growing Espionage Threat to U.S. Businesses

Bill Priestap, Founder Trenchcoat Advisors, LLC

As a former FBI assistant director of counterintelligence, Bill Priestap, is well-versed in the threats facing U.S. corporations from a host of bad actors including nation-state spy services tasked with obtaining a company's vital intellectual property. Companies must determine all that needs protecting; anything that provides a business with a competitive edge may be targeted and exploited. Spy services often look to employees as an entry point into a company. Mitigating corporate espionage will chiefly depend on how well employees are trained in counterespionage. This presentation will address the tools, techniques and knowledge needed to safeguard your company's secrets.

You Will Learn:

- Prepare and assist employees being targeted
- Identification of critical assets
- Effective and practical countermeasures

Monday, April 25 10:30am-11:30am

Navigating the New Cybersecurity Threat Landscape

Mike Herrington, Cyber Section Chief FBI

The rapidly evolving national security landscape proves that cyber threat actors remain undeterred from seeking to damage the US defense posture through theft of critical defense information and technology and disruption of critical infrastructure that supports the defense community. Chinese and Russian state-sponsored hackers have been regularly observed targeting U.S. classified information, sensitive technology and our national critical infrastructure and supply chains. The cyber threat from hostile nation-states—including China and Russia — calls for a new mode of collaboration and sharing with the private companies that are now on the front lines. This presentation will examine emerging cyber threats and how to defend against them.

You Will Learn:

- Cyber threats to watch in 2022
- Key risk mitigation practices

"I look forward to attending the Impact seminar every year. As an FSO, the topics, speakers and workshops provide invaluable information that helps me do my job better." Jeff Caddy MarkLogic Corp. Monday, April 25 11:30am-12:30pm

DCSA: Initiatives and Priorities for 2022

Gus Greene, Director, Industrial Security Field Operations, DCSA

The rapidly evolving national security landscape proves that cyber threat actors remain undeterred from seeking to damage the US defense posture through theft of critical defense information and technology and disruption of critical infrastructure that sup-ports the defense community. Chinese and Russian state-sponsored hackers have been regularly observed targeting U.S. classified information, sensitive technology and our national critical infrastructure and supply chains. The cyber threat from hostile nationstates—including China and Russia — calls for a new mode of collaboration and sharing with the private companies that are now on the front lines. This presentation will examine emerging cyber threats and how to defend against them.

You Will Learn:

- New security requirements in the pipeline
- Next phase of Trusted Workforce Initiative
- Security policy changes and impacts

Monday, April 25 2:00pm-3:15pm

Track 1 — Cybersecurity Essentials for FSOs

Robby Ann Carter, ČEO SASSI/NSTI

In the modern workplace, there are many challenges that security teams need to be prepared for — whether it's phishing, BYOD, IoT, the list is long. Complicating matters? The growing use of unauthorized apps and the added obstacle of Shadow IT. While today's workforce is increasingly technology savvy, their understanding of the risks they introduce has not kept pace. Keeping your organization safe from cyber risk is everyone's job, not just the IT Department.

You Will Learn:

- > How to identify and mitigate the risk of Shadow IT
- > Actionable recommendations to address vulnerabilities
- Cybersecurity awareness best practices

Monday, April 25 2:00pm-3:15pm

Track 2 — NISPPAC: Hot Button Issues For 2022

David Tender, Sr. VP, CSO ASRC Federal

The National Industrial Security Program Policy Advisory Committee (NISPPAC), comprised of both Government and industry representatives, is responsible for recommending changes in industrial security policy. The group also advises the Information Security Oversight Office on all matters related to the National Industrial Security Program (NISP). In 2022 they'll be working to create a new path forward on a number of security fronts. Attend this workshop to find out what's on the NISPPAC agenda and how you can help shape the future of the NISP.

You Will Learn:

- Security policy changes on their radar
- Risk based industrial security oversight
- ➤ Industry engagement and top issues

Monday, April 25 3:35pm-4:50pm

Track 1 — Roadmap: Risk Management Framework and eMASS

Jonathan Cofer, Senior ISSP, DCSA

DCSA has adopted the NIST Risk Management Framework (RMF) standards as a common set of guidelines for the assessment and authorization of information systems to support contractors processing classified information. Information systems must be authorized prior to processing classified information. All requests for authorizations or reauthorization must be submitted through eMASS. This workshop will take you through the various steps to IS authorization and security plan approval. Navigating the RMF process can be confusing so come prepared to learn.

You Will Learn:

- ➤ Comprehensive RMF process walk through
- ➤ How to complete required eMASS tasks
- Key missteps to avoid

Monday, April 25 3:35pm-4:50pm

Track 2 — Improving Security Awareness Using Marketing Techniques

Mitch Lawrence, CEO, Lawrence Solutions LLC

Security awareness and training is a critical element in the security practitioner's toolbox that helps organizations respond better to security threats and prevent security robbing behaviors. With just a few adjustments to how your organization plans, creates and manages awareness activities, it can build awareness campaigns that are more engaging and perform better. By adapting the techniques that marketing teams use to gauge their brand awareness and interactions with potential customers, your company or agency can get increased buy-in from employees and maximize your security awareness results.

You Will Learn:

- > Ways to increase security motivation
- ➤ How to create effective messaging
- Key marketing techniques you can leverage

EDUCATIONAL SESSIONS

Tuesday, April 26 8:00am-8:45am

Defending Against Economic Espionage In the Digital Era

Alan E. Kohler, Jr., FBI Exec. Asst. Director, Counterintelligence Division

U.S. intelligence officials warn that the foreign spying threat is increasing in both scale and sophistication. Every day, U.S. government and defense contractors are targeted by hostile nations for espionage and theft, result-ing in huge losses of national security information and technology secrets. Staying ahead of the threat requires constant vigilance. Heading into 2022, we should expect nation-state actors to con-tinue their multi-pronged espionage efforts against the United States. The FBI has over 1,000 open cases of attempted theft of U.S. intellectual property, across a range of industries. The FBI estimates that Beijing steals \$200 billion to \$600 billion worth of military and economic secrets from the U.S. every year.

You Will Learn:

- Paradigm shift in the threat landscape
- Whole-of-society approach to counter threats
- Spy tactics and exploitation methods

Tuesday, April 26 8:45am-9:30am

Counterterrorism: Examining the Evolving Threat Surface

Geoffrey Fowler, NCTC's Asst. Director, Office of IT Services

Threats to U.S. national security will expand and diversify in 2022, with technology playing an increasing role. As the contemporary terror-ist threat changes, it is being amplified by technological advances that are making extremist groups more con-nected, more resilient and more capable than ever before. Although we have become much more capable at detecting terror threats, our enemies are determined and ingenious. This session will examine current trends in counterterrorism along with the changing face of terrorism—both domestic and international.

You Will Learn:

- ➤ Terrorism trends to watch in 2022
- Changing nature of the threat
- Risk mitigation strategies

Tuesday, April 26 9:50am-10:50am

Managing the Human Side Of Cyber Security

Shayla Treadwell, Director, Cybersecurity-Organizational Psychologist, ESC Federal

Media reports on the cyber threat frequently cite highprofile, high-impact cyber attacks carried out by organized, sophisticated and deliberate cyber criminals. However, research shows that the everyday behavior of employees presents one of the greatest risks to your organization. While technical defenses are important, they have limited effect if they are undermined either intentionally or unintentionally by employees. A critical part of your security strategy must be to focus on the human element of your organization.

You Will Learn:

- Cyber behaviors that undermine security
- Challenges of multigenerational workforce
- Keys to creating a positive security culture
- Psychological impacts of security awareness programs

Tuesday, April 26 10:50am-11:50pm

Understanding Clearance Vetting, Adjudication & Appeals

Perry Russell-Hunter, Director DOHA

Several initiatives designed to bring the security clearance process out of the 20th century are actively underway or soon to be deployed. Everything from the type of security clearances themselves to the standards used to investigate and adjudicate clearance holders are evolving. Among the new process reforms are: continuous vetting of security clearance holders, reviewing existing standards used to establish trust with an employee or contractor and migrating from the five current investigative tiers to three. Attend this session to see where clearance reforms are headed and how it impacts your organization.

You Will Learn:

- Security clearance plans and reforms
- Key goals and timelines for 2022 and beyond
- Trends in adjudications and appeals

"This was my first time attending an Impact seminar. I obtained information in which I would not have access to otherwise. I look forward to attending again."

Latoya Rose, ANSER

Tuesday, April 26 1:30pm-2:45pm Track 1

Track 1 — How to Build an Effective Insider Threat Program

Dr. Shawn Murray, President Murray Security Services

Insider threats can come in many forms, and federal agencies and contractors should double down on continuous monitoring for early detection of individuals under pressure or stress, as well as misconduct, high-risk behaviors, and digital anomalies. There is a high probability the next attack on our government will come from a vetted, trusted insider — someone who doesn't need to find the key to unlock our defenses because they are already inside. If there is any chance of preventing that eventuality, we need to continually evaluate and strengthen our insider threat programs and challenge our current assumptions and processes.

You Will Learn:

- > Steps to building an insider threat program
- ➤ How to gain buy-in from key stakeholders
- Lessons learned from the experts

Tuesday, April 26 1:30pm-2:45pm Track 2

Track 2 — Personnel Clearance Innovation: The VROC & CAF

Michael Ray, VROC; Michael Faller DCSA: Charis Lyon, Division Chief, DCSA and Tracy Thornton, DCSA

DCSA's Vetting Risk Operations Center (VROC) has achieved a milestone in enrolling 100% of DoD cleared population into its continuous vetting program. The VROC currently oversees personnel security within the National Industrial Security Program as well as Continuous Evaluation (CE) across the entire Department of Defense. Along with the DoD's Consolidated Adjudication Facility, the VROC acts as the central nervous system for the security clearance process where initial applications pass through all phases of the vetting process to final eligibility approval at the CAF. Find out how these two vital clearance processes intersect and how automation will improve quality and timeliness of clearance decisions.

You Will Learn:

- Common VROC e-Qip reject reasons
- Industry's average timeliness trends
- Clearance reciprocity initiatives

Tuesday, April 26 3:05pm-4:20pm Track 1

Track 1 — DCSA Industrial Security Program Issues and Answers

Michael Halter, Deputy Asst. Director for National Operations, (ISD), DCSA

DCSA's vision to change the way it oversees industrial security is being ramped up for 2022. The agency wants to move from a compliance-based "check the box" inspection mentality to one that prioritizes cleared industry's most important technology first. The agency is implementing a new methodology that is based on knowing the assets at each facility, analyzing threats to those assets, identifying vulnerabilities, and applying appropriate countermeasures. This new methodology couples NISPOM compliance with an intelligence-led, asset-focused, and threat-driven approach. Keeping up with changing requirements is critical to avoid security compliance issues and safeguard classified information.

You Will Learn:

- Strategies for keeping your program in compliance
- Industrial security program oversight priorities
- New Security Rating Score model

Tuesday, April 26 3:05pm-4:20pm Track 2

Track 2 — Solution for Implementing CUI Requirements

Curtis H. Chappell, Director, Corporate Security Thales Defense & Security, Inc.

Because there are fewer controls over Controlled Unclassified Information (CUI) as compared to classified information, CUI is the path of least resistance for adversaries. Loss of aggregated CUI is the one of the most significant risks to national security, directly affecting the protection and lethality of our warfighters. As a starting point for CUI oversight, the DCSA CUI Program Office has been established and assessments of defense contractors contractually obligated to protect CUI, will be conducted during future Security Reviews. Learn about the CUI program, how it impacts you, and the steps you can take to be prepared for implementation in your organization.

You Will Learn:

- Key elements of the CUI program
- > Update on agency implementation efforts
- CUI best practices

Growing Cyber

Networks

Wednesday, April 27 8:45am-9:45am

Assessing China's Cyber and Human **Intelligence Gathering Activities**

The People's Republic of China reportedly operates the single largest intelligencegathering apparatus in the world—and its growing appetite for secrets is seemingly insatiable. The Chinese Communist Party (CCP) openly has declared its intent to dominate high-tech industries across the world by 2025. Current and former intelligence officials say that no country not even the Soviet Union at its peak — spies on the U.S. in such a comprehensive way as China now does. While other nations, including North Korea, Russia and Iran, have carried out sustained attacks on American computer networks, China stands in a class by itself.

You Will Learn:

- > Top cyber threats for
- How adversaries are targeting defense networks
- Intelligence sharing initiatives

Mark Kelton, Partner, FiveEyes Group

You Will Learn:

- China's evolving intelligence operations
- Cyberespionage againsttheU.S.
- PRC strategies to target, recruit and maintain contact

Annual State of the **Insider Threat: Defending Against**

The Next Snowden

Wednesday, April 27 10:05am-10:50am

Steven Bay. Dir. of Threat Intelligence. Security On-Demand (Invited)

Steven Bay, a former defense contractor, knows a thing or two about insider threats. For a time, he was the boss of Edward Snowden, the infamous leaker who stole highly classified information from the National Security Agency. In this presentation you will hear the inside story of the Snowden affair from his former boss and the lessons we learn from it. You will develop a better understanding of who insiders are, why they do what they do, and strategies you can deploy to better protect yourself from them.

You Will Learn:

- Lessons learned in a post-Snowden world
- Strategies for spotting insider threats
- Best practices for insider threat mitigation

Wednesday, April 27 10:50am-11:35am

Leadership Through **Security: The Changing** Role of the FSO

Lindy Kyzer, Director of Content & PR. ClearanceJobs

"Change is the only constant"—This time-worn phrase has special significance for security professionals in the National Industrial Security Program. We all know our role as FSO is constantly morphing as sweeping policy changes and technological advances now require us to wear many hats. The problem is these hats aren't necessarily the ones we want to wear, or signed up to wear. But to be successful in this new era, FSOs must evolve into advisors, educators and business enablers who can communicate the value of security to both management and employees. This session will show you how to adapt and thrive in this new environment.

You Will Learn:

- FSOs new playbook for
- Best practices to become an effective leader
- ➤ New tools you must add to your arsenal

"Very professional! One of the better seminars I have attended. Presenters, materials, facilities all excellent."

> Michael Alvarez Naval Special Warfare Command

 165 Main St., Ste 215
 Medway, MA 02053
- **4.** Call (508) 533-9099

REGISTER EARLY AND SAVE \$50

Earlybird Discount

A special rate of \$1,045 is being offered to all attendees whose payment is received by February 18, 2022. The registration fee covers all program materials, host reception, luncheons and refreshment breaks.

Regular Rate

The fee for registrations received after February 18, 2022 is \$1,095. All registrations must be accompanied by a check made payable to the National Security Institute, a Purchase Order or Government Training Form. You may also charge your MasterCard, Visa or American Express.

Cancellation Policy

Cancellations must be made in writing to the National Security Institute. Refunds for cancellations received on or before March 25th will be subject to a \$50 administrative fee. Cancellations received after March 25, 2022 will forfeit the conference fee. Substitutions may be made at any time by calling NSI.

Seminar Hours

Monday, April 25

Registration 7:00 am. -7:50 am.

Conference 7:50 am. -4:50 pm.

Networking Reception 5:00 pm.-6:30 pm.

Tuesday, April 26

Conference 7:50 am. -4:20 pm.

Wednesday, April 27

Conference 7:50 am. -11:45 am.

Security Awareness Fair and Expo

Monday, April 25, 9:30 am. - 3:35 pm.

Meeting Attire

Attire for the National Security Institute's Impact Forum and Exhibition is business casual.

Hotel Reservations

To reserve your room call Marriott Passkey at **1-800-266-9432** or reserve your room online at https://book.passkey.com/e/50239893. When calling, please ask for the NSI IMPACT 2022 rate at the Westfields Marriott in order to receive the discounted group rate of \$209. The

group rate will be available until March 28th or until the group block is sold-out, whichever comes first. Please be aware the room block fills quickly, so we suggest you make your hotel and travel plans early.

The Westfields Marriott is located at 14750 Conference Center Drive, Chantilly, Virginia, 20151. The Westfields Marriott hotel combines sophisticated meeting facilities with elegant hotel accommodations and also features access to the Westfields Signature Fred Couples Golf Club.

About NSI

Founded in 1985, the National Security Institute (NSI) is a veteran-owned publisher and educator serving the needs of security professionals in government, the corporate sector, and defense contracting. We publish newsletters and special reports, we sponsor seminars and conferences, and we produce the industry's most respected and cost-effective security awareness services. We also offer government and industry security professionals a FREE e-newsletter, delivering national and international news pertinent to the security profession. Visit us at http://nsi.org.

Who Should Attend IMPACT 2022...

- ♦ Facility Security Officers
- ♦ Information System Security Professionals
- ♦ Government Personnel Security Managers
- Corporate Security Directors
- ♦ Information Security Managers
- Classification Management Specialists
- ♦ Counterintelligence Professionals
- Security Education and Training Specialists
- Government Agency Security Specialists
- Classified Material Control Specialists
- OPSEC Managers
- ♦ Security Adjudicators
- ♦ Insider Threat Program Managers

Why IMPACT 2022 Will be Your Most Critical Professional Experience of the Year

- You'll get up to date on the hottest security issues: security clearances, DISS, NISP, classified systems security, economic espionage, cyber security threats, security awareness, terrorism, insider threats.
- You'll return to your office with an entire reference library that will put the information you need at your fingertips: binder, DVD, follow-up e-mails.
- You'll gain networking contacts you can call on all through the year: make friends; get to know the major figures in your profession.
- You'll learn about key developments of the past year and what to expect in the year ahead in a relaxed atmosphere conducive to education.
- You'll learn security's latest best practices... and return to your office prepared to implement solutions before they are needed and eliminate security vulnerabilities before they happen.
- You'll spend 3 days with people who understand and care about what you do every day because they do it, too!

11 Special Features of IMPACT 2022
